

Melissa's Storyboard

This storyboard has blank boxes with lines underneath for text. I drew a picture of each shot I wanted to show in my video, and then I wrote under each picture what I wanted to say. Even stick figures will work as long as you know what they are supposed to represent.

Making this storyboard helped me to keep my video organized. It also helped me to fit everything I wanted to say into the two minute time limit. When I broke the video down into 5 or 10 second sections, I could see how I could make the whole video fit together.
